Annual ISO-17025 Audit

I'm proud to announce that Rogan Incorporated has again passed our annual ISO-17025 audit.

Every year the auditors seem to be more aggressive and dig until they find something. I'm glad to say we made them work for their money this year thanks to our Service and Quality departments. If you need a copy of our current scope and accreditation please call or email service@roganinc.com.

IP this and IP that. - What is it and why do I care?

IP - Ingress Protection ratings are to specify the environmental protection a device or enclosure provides.

It's critical to know what protection your environment requires. Failure to do so will end up costing you hundreds of dollars in repairs and parts usage. Our sales engineers are trained to recommend the correct scale equipment for your application. Towards the end of this article I will list a few ratings for liquids, dust and particulates.

Take the time to understand the ratings and what your site requires. Purchasing the right equipment will benefit your profitability by reducing down times and reliable weighing accuracies. If you want to learn more please contact us.

63	Protected against direct sprays of water up to 60° from the vertical.
64	Protection against water sprayed from all directions - limited ingress permitted.
65	Protected against low pressure jets of water from all directions - limited ingress.
66	Protected against temporary flooding of water, e.g. for use on ship decks - limited ingress permitted.
67	Protected against the effect of immersion between 15 cm and 1 m.
68	Protects against long periods of immersion under pressure.

Mettler Toledo ICS Series

The new METTLER TOLEDO ICS Series of weighing platforms and terminals for manual checkweighing, portioning, and classifying improves on their legendary ColorWeight technology in combination with best-in-class hygienic design.

Double-gasketed terminals, re-designed hygienic column, pressure testable columns and terminals, re-designed connector plugs, flexible data interfacing and more all combine to provide a superior yet competitive solution for demanding environments.

Call our office to request additional information on this great new product.
